# Response to Arguments

Applicant's arguments filed July 10, 2007, have been fully considered but they are not persuasive. The examiner's assertion that display of the focus of the energy would be intuitive is substantiated by the inclusion of a reference to Bucholz et al. in the following rejections.

Applicant's Terminal Disclaimer is not effective, as it is not signed by the attorney of record.

# Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1, 2, 4, 5, 16-17, 19-21 and 36 are rejected under 35 U.S.C. 103(a) as being unpatentable over WO 01/82778 to Focus Surgery, Inc. in view of U.S. Patent 6,236,875 to Bucholz et al. WO 01/82778 teaches an ablation system with visualization using transducers to transmit high intensity focused to a tissue target (abstract). Ultrasound transducers (Fig. 2, # 30) are disclosed in a catheter with a proximal and distal end (page 4, lines 10-16). The

Art Unit: 3739

transducers are used for both HIFU and imaging and can be separately controlled (page 5, line 15-20). The transducers may be phased in a manner to vary the focus of the array (page 5, line 32) thus providing a variable depth and steerable beam (page 8, lines 5-12). This inherently requires a controller and the steerable capability is interpreted as two-dimensional, thus capable of a linear ablation. A display unit is also disclosed, however, the display of the focal point of the HIFU is not disclosed. Bucholz et al. teach a surgical navigation system with positional and imaging capabilities. A processor may modify a display to indicate the position of the instrument or the **instrument's focal point**, such as by positioning a cursor (marker), with respect to the body elements (Col. 10, lines 55-58). It would have been obvious to one skilled in the art to include the display of the focal point of the surgical instrument as taught by Bucholz et al. in the invention of Focus Surgery, Inc to clearly indicate the target of the instrument as clearly taught by Bucholz et al.

### **Double Patenting**

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 3739

Claims 1, 4-5, 16 and 19-20 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1, 3-5 of copending Application No. 11/494387. Although the conflicting claims are not identical, they are not patentably distinct from each other because they are an obvious change in scope based on intended use.

This is a <u>provisional</u> obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

### Allowable Subject Matter

Claims 25, 27-34 and 40-41 are allowed.

#### Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
